17.30 Visit to the oldest Winery in Slovenia with degustation of wines

Nothing goes without love and passion. Everything we do, everything we create, we do because we believe that only with full commitment, passion and love, you can change the world and create with striving for perfection. We believe in the excellence of our wine growing region, we believe in our commitment to excellent wine growers and our exceptional winemaker. Our beliefs are based on two milleniums of passion and love for wine, which marked the evolution of our lands for ages.

This is reflected in each and every glass of Pullus, Haložan, Pinky Chick and Petovia. In every drop of wine, we have invested at least two drops of sweat. With smile on our faces. Happy. Knowing that we captured pure flavors and aromas of nature, rustling seasons, the genesis of grape varieties, with with our fingerprint healthy into the glass. We believe in our wines. We know why and we are convinced that you will start to believe too. After your first sip.
