# Summary

- If you have an idea, how to market your products, then don't think no more, just act. Make arrangements, make calls and a lot of e-mails.
- Facebook is cheapest way to advertise you company, so use it. Make posts once a week.

Best advertisement is good quality product and if your clients share and recommend your products from friend to friend. It gives good result.

Hardest part is sharing you most valuable resource- time.

To manage with this is making plans for week and month and to-do lists or daily work.
